**HPL COMPACT
TABLE TOPS**

STOCK PROGRAM

black core
10mm th

HPL or High Pressure Laminate consists of kraft paper sheets impregnated with phenolic resins and a decorative paper sheet impregnated with melamine resins.

Table tops made with this technology are excellent in terms of high mechanical and chemical resistance, and thanks to the incredible ease of maintenance and cleaning they are an ideal product for use in professional destinations such as public places, bars and restaurants, both for indoor and outdoor use.

The upper decorative layer offers wood, stone or marble effects as well as simple plain colours.

The result not only looks natural, but also lifelike.

Fields of application

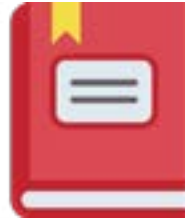

Offices

Hospitality and Catering

Schools

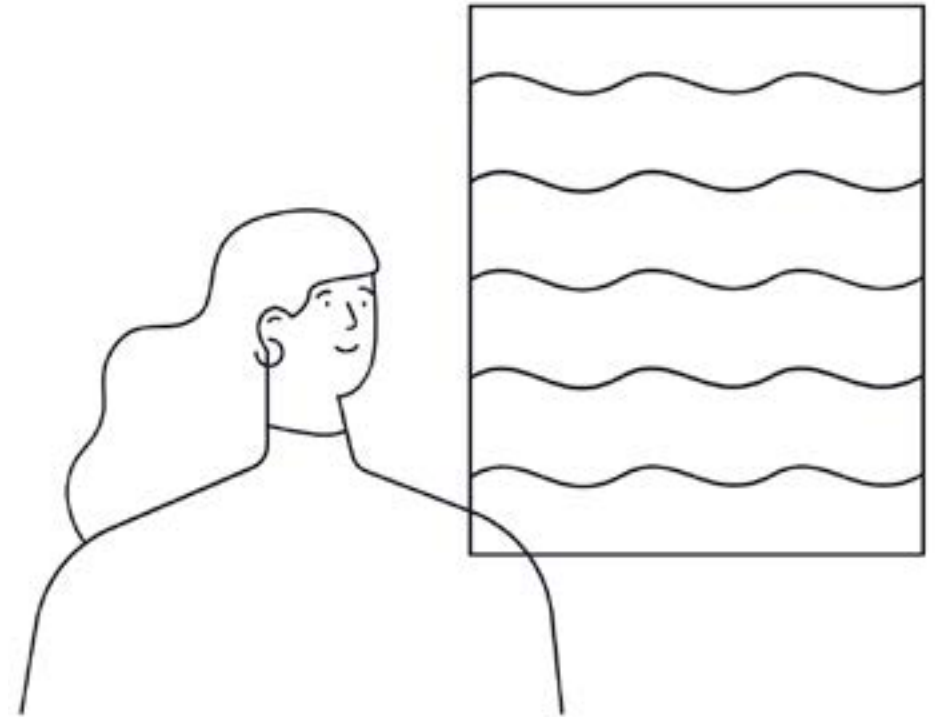

Retail and Contract

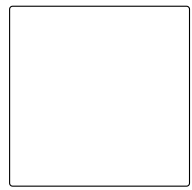

Kitchens

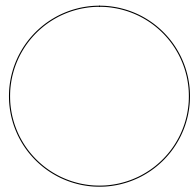

Health and Well-being

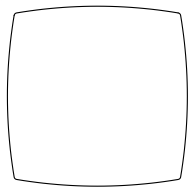

Our main Table Tops shapes

Table Top Finishes

ALV:

the finish that emphasises the beauty and tactile quality of the wood decors.

KER:

a matte texture that adds sensuous tactility. Tactility at first sight, elegance at first touch.

LUNA:

a rough surface, nice to touch, that enhances the decor by reproducing the geometries of stones.

URB:

sophisticated combination of concrete and stone, a lightweight structure, pleasant to touch.

R:

this finish distinguishes itself for its touch appeal: silky-smooth compact surfaces which soften colors and highlight the harmony of composition.
